

THE DENTIST OFFICE

BIG ROOM SOUND

Dr. Daniels is the only dentist I've ever known and he was gracious enough to let me roam around his office after hours collecting these sounds. The intent was to gather source material for hi-tech gadgetry so the library contains a nice selection of tools and equipment including drills, a mouth vacuum, an ultrasonic water sprayer, dental lathe, dental kiln, a creepy sounding dentist chair and a wicked cool CEREC machine (diamond tipped milling machine that cuts dental implants). The handheld tools are "performed" so as to create movement, pass by's and simulate power fluctuations.

Specs: 44 files • 100 sounds • 24bit/96k • 792MB • thoughtful metadata
